

BREWERY PRODUCT GUIDE

CAUSTIC CIP

AVOID II	A heavy-duty liquid alkaline CIP cleaner. Avoid II is specifically formulated to be effective against both organic and inorganic soils.
MIP™ BC	A multi-purpose product for brewery cleaning, including fermentation tanks and kettles, to prevent scale and mineral deposit formation.
AC-101™	A heavy-duty liquid alkaline cleaner for CIP, bottlewashing and spray cleaning applications. AC-101 helps to eliminate need for additional wetting agents, and provides fast soil penetration and emulsification to speed cleaning applications.

ACID CIP

TRIMETA™ PSF	A phosphate and surfactant-free single-phase acid cleaning for CIP in the brewing industry. Trimeta PSF is specifically designed for cleaning soils in fermentation tanks, bright beer tanks, and other cellar equipment while under CO ₂ .
TRIMETA™ XS	A single-phase, low-foaming acid cleaning for the brewery industry. Trimeta XS is specifically formulated for CIP cleaning of fermentation tanks, bright beer tanks and other cellar equipment on all types of soils.
ENVIROCID™ PLUS	A highly concentrated, phosphorus-free, blended acid detergent containing wetting agents and a red dye. Envirocide Plus is designed for CIP circulation and COP cleaning of 304 and 316 stainless steel equipment to promote quality assurance and save time and money.
AC 55-5 RED™	A highly concentrated, blended acid specially formulated for CIP and COP cleaning of processing equipment where low foam characteristics are required. AC 55-5 Red saves time and money and helps promote quality assurance.
HD ACID PL-10™ PLUS	A concentrated, non-foaming, tri-blend detergent, which helps remove alkaline films to leave equipment shiny and film-free.

CIP ADDITIVES

STABICIP™ OXI	A liquid oxygen cleaning additive used with alkaline and acid CIP detergents for the removal of difficult complex soils.
XY-12™	A liquid, sodium hypochlorite sanitizer that leaves no sediment, deposits or films to touch up.
OXY-PAK™	A stabilized hydrogen peroxide product especially formulated for use in aseptic packaging and processing.

SANITIZERS

VORTEXX™	A peroxyacid-based sanitizer that delivers antimicrobial activity on yeast, molds and bacteria. Vortexx enhances finished product quality by reducing pathogenic organisms.
SYNERGEX™	A U.S. EPA Registered mixed peracid-based sanitizer and disinfectant. This patented antimicrobial agent helps protect against many pathogenic and environmental microorganisms as well as bacteriophage, broad yeast, and mold in a number of sanitizing applications.
STER-BAC™	A liquid quaternary ammonium sanitizer that is ideal for deodorizing, disinfecting, no-rinse sanitizing, and is effective against <i>Listeria monocytogenes</i> .

ENVIRONMENTAL CLEANERS

ENFORCE™ LP	A self-foaming, chlorinated alkaline cleaner for foam, spray and soak cleaning of stainless steel processing equipment and environmental surfaces.
SOIL-OFF™ II	A nearly neutral general purpose cleaner formulated to effectively dissolve and lift grease, oils, and other protein soils. Soil-Off II requires minimal hand scrubbing and is generally suited for equipment, walls, and floors in food processing establishments.
MIKROKLENE™ DF	An iodine-based cleaner that can be automatically and precisely metered through Ecolab proportioners to reduce manual contact.
FOAM-SHINE™	A liquid self-foaming dual blended acid detergent suitable for manual and foam cleaning applications. This one-step detergent requires no additional wetting agents for foaming and the high acid level assures rapid mineral soil removal.
LIFT™ III	A low alkaline foaming cleaner formulated with a special blend of solvents for manual or foam cleaning of floors and walls or maintenance areas. The unique formula enables a broad use-range of surfaces including tile, block, concrete, painted surfaces and most metals.
HEAVY DUTY ACID LC-30	An inorganic acid product with selected wetting agents to neutralize, soften and remove heat-hardened deposits including milkstone, water and mineral films.

LUBRICANTS

DRYEXX™ GF	A premium conveyor lubricant designed for stainless steel conveyors. DryExx GF provides excellent lubrication and cleaning performance to promote mobility of glass packages on high and low speed stainless steel conveyors while minimizing water consumption.
DRYEXX™ PRO	A versatile conveyor lubricant, providing excellent lubrication in both wet and dry modes that promotes enhanced mobility of PET and aluminum packages on high and low speed plastic conveyors and can transfers.
VEKTOR™ 100	A unique, low foaming, synthetic conveyor lubricant designed for use with glass packaging on stainless steel or mixed conveyor systems. It is specially formulated with corrosion inhibitors to promote clean chains.
